Summary

This report provides a summary of the operating performance for financial year 2018-19 (Quarter 1) ending 30 September 2018.

Actions to improve the operation of the regulatory system includes:

Stakeholder Feedback Survey

The Earth Resources Regulation stakeholder feedback survey was emailed out to a range of industry, government and community stakeholders in July 2018. The purpose of the survey was to measure the baseline satisfaction with Earth Resources Regulation’s performance as a regulator and to gain a better understanding of key issues within the industry. Results of the survey can be accessed at http://earthresources.vic.gov.au/earth-resources-regulation/about-us/earth-resources-regulation-stakeholder-survey

Stand out performance indicators in Q1 of FY 2018-19:

• KPI 1 - 96% of licence applications were determined within the statutory time. 98% of work plan stages were assessed within the statutory time.
• KPI 2 - There were 98 operational compliance activities undertaken, above the target of 75. Issues requiring remedial actions were identified at 66% of audited sites.
• KPI 3 - There were two reportable incidents which were responded to this quarter.
• KPI 4 - Earth Resources Regulation held one Stakeholder Reference Group, one Earth Resources Regulators’ Forum and attended 100% of the Environmental Review Committee meetings in Q1
• KPI 5 - The time to respond to complaints took on average one business day.

Earth Resources Regulation will continue to engage with industry and the community in 2018-19 to meet our performance targets and to achieve a safe and sustainable Victorian earth resources sector.

Key Performance Indicator Reporting

Earth Resources Regulation is Victoria’s earth resources regulator – our role includes licensing, risk management, compliance responsibilities and stakeholder engagement. We are committed to being an accountable and transparent regulator in all aspects of our work.

Earth Resources Regulation is one of the Department of Economic Development, Jobs, Transport and Resources’ (DEDJTR) regulators. The branch is guided by the department’s compliance framework and policy. This whole-of-department policy requires regular performance measuring and reporting to demonstrate the effectiveness of Earth Resources Regulation’s compliance activities over time. Earth Resources Regulation uses a range of indicators to monitor its activities and performance. Earth Resources Regulation will publish key performance indicators on its website on a quarterly basis. Earth Resources Regulation will review KPIs and targets annually. Public reporting of the data will allow stakeholders to continue to monitor Earth Resources Regulation’s progress.

This report complies with Earth Resources Regulation’s reporting obligations under the Compliance Strategy 2016-18 and Client Service Standard 2016-2018.

<td><strong>Total</strong></td>
<td></td>
<td></td>
<td>17</td>
<td>9</td>
<td>17</td>
<td>26</td>
<td>66%</td>
</tr>
</tbody>
</table>

**Explanation for the result:**
The number of variations finalised increase to 42 during Q1. 88% of the mineral licence variations were completed within the client services standard (ie the measure where no statutory time frames exist).

12 Work Authority licence variations were also finalised in the quarter.

This indicator measures how well the department meets its client service standard when processing approvals. This indicator has two measures: applications that have a legislated statutory time frame and applications that do not. Earth Resources Regulation began reporting on client services standard in July 2017.

* Work Plan Stage performance results may be subjected to change as a result of data cleansing activities in the RRAM database

Explanation for the result:
In Q1 Earth Resources Regulation assessed 48 work plan stages, of which 47 were assessed within the stage’s statutory time frame.

Earth Resources Regulations assessed multiple stages from some work plans in the quarter as the 48 work plan stages assessed were from 32 unique work plans. During the Q1 quarter eight work plans were finalised.

The improved assessment performance can be attributed to improvements gained through an increased focus on statutory timelines and better engagement with industry.

Why are these measures important?
Earth Resources Regulation is the regulator responsible for administering various legislation including the Mineral Resources (Sustainable Development) Act 1990 (MRSDA). Earth Resources Regulation understands its responsibilities as a regulator to ensure timely processing and approvals.

Earth Resources Regulation is striving for a consistent and transparent approvals process, balancing efficiency but maintaining the rigour required for comprehensive assessment, consistent with the legislation.

<td>98</td>
</tr>
</tbody>
</table>

Explanations for the results:
In Q1 Earth Resources Regulation conducted 98 proactive compliance activities on 84 duty holders, exceeding the 75 compliance activities target by 23.

Why are these measures important?
Earth Resources Regulation undertakes proactive compliance activities using a risk-based approach as part of its stewardship role in the sector. Activities include audits, inspections, meetings with duty holders (meetings) and site closures after reviewing rehabilitation (site closure).

Earth Resources Regulation undertaken compliance actions under the *Mineral Resources (Sustainable Development) Act 1990, Petroleum Act 1998* and other legislations, to identify and act on any audits or omission by the duty holder that has, or is likely to result in a risk to public safety, the environment, land, property or infrastructure, or is a non-compliance with a licence or work authority conditions. Compliance activities are actions designed to mitigate risk in the sector.

Earth Resources Regulation maintains a risk-based approach to targeting inspections and audits in order to mitigate acts of non-compliance by duty holders.

</tr>
</tbody>
</table>

Explanations for the results:

From the total of 98 compliance activities conducted in Q1 on 84 duty holders, 12 were audits.

Earth Resources Regulation's compliance program aims to drive improved industry performance and is focussing on management of the following risks to protect public safety and the environment: Rehabilitation, Fire, Dust, Noise, Stability, Water and Approval Conditions.

Fire and Dust audits are usually focused in the summer months.

For further information on compliance priorities see the Earth Resources Regulation Compliance Strategy (www.earthresources.vic.gov.au/earth-resources-regulation/regulatory-compliance).

Action requirements on Audits

Explanations for the results:

Industry non-compliance for 2018-19 Q1 was at 66%, 8 out of 12 compliance audits in Q1 required remedial actions to be taken, an increase of 2% from last quarter and consistently above 60% in the last four quarters.

Why are these measures important?

This indicator measures the percentage of current tenements that have had a compliance activity undertaken. This measure shows how many duty holders are meeting requirements.
Enforcement Activity Issued in Q1

<td>Environmental</td>
<td>46. Other</td>
</tr>
<tr>
<td>Mining Licence</td>
<td>Minor</td>
<td>Legislation Breach</td>
<td>7. Complaints Management</td>
</tr>
</tbody>
</table>

Why are these measures important?
This measure shows whether Earth Resources Regulation is responsive to high risk incidents that occur at tenement sites. The indicators measure the number of compliance and enforcement actions that Earth Resources Regulation inspectors commenced, completed and closed in a particular period. Incidents, depending on it’s complexity, may be resolved in the subsequent quarters.

Explanation for the result
There were two reportable incident in Q1 both relating to air blast exceedances at a quarry. Earth Resources Regulation waiting on further information from the licensee.

Two minor non reportable incidents were recorded for the quarter, a small leak from a pipeline and a truck using an unapproved route and failing to observe curfew.

Summary
Earth Resources Regulation will continue to proactively undertake compliance activities, focussing on stability, public safety and environmental impacts.
KPI 4 Facilitation of Stakeholder Engagement

### Environmental Review Committee Attendance

<table>
<thead>

<td>18</td>
</tr>
<tr>
<td>% Attendance</td>
<td>100%</td>
<td>100%</td>
<td>95%</td>
<td>100%</td>
</tr>
</tbody>
</table>

**Explanation for the result:**
Earth Resources Regulation attended 18 of the 18 Environmental Review Committee meetings, achieving 100% attendance rate in Q1.

**Why are these measures important?**
The Stakeholder Engagement indicator covers the interaction between the regulator, duty holders, co-regulators and the community by reporting on active participation by Earth Resources Regulation at Environmental Review Committee meetings. Earth Resources Regulation has made a commitment in the Compliance Strategy to report on ERC attendance quarterly.

### Stakeholder Reference Group

**Explanation for the result:**
The target is an annual figure based on Stakeholder Reference Group meetings being scheduled every three months.

There was one SRG meeting held by Earth Resources Regulation in Q1. On track to meet the annual target.

**Why are these measures important?**
The Stakeholder Reference Group provides a forum for engagement and consultation with stakeholder representatives from industry associations and government agencies regarding statutory, regulatory and stakeholder relations issues and activities in the context of the current policy and regulatory framework.

### Earth Resources Regulators’ Forum

**Explanation for the result:**
The target is an annual figure based on three Earth Resources Regulator Forum meetings being scheduled each year.

Earth Resources Regulation held one forum in Q1 and is on track to meet the annual target.

**Why are these measures important?**
The Victorian Earth Resources Regulators’ Forum drives a coordinated, strategic approach to regulation in the earth resources sector. Through the forum and its independent chair Earth Resources Regulation will coordinate its activities with other regulators to improve timeliness, reduce compliance and administrative costs to industry, and identify and resolve any regulatory gaps or overlaps. This will include a focus on more real-time communication, strategic sequencing, common risk assessment and partnerships with local government authorities.
Response Time to Complaints 2018-9 Quarter 1

**Complaints vs Average Days to respond**

- FY 2017-18 Q2
- FY 2017-18 Q3
- FY 2017-18 Q4
- FY 2018-19 Q1

**Explanation for the result:**
There were 20 complaints in Q1. Top 3 complaints were Working without Licence or Consent, Dust and Noise Emissions. 11 of the complaints are resolved and 9 are under investigation. On average all complaints were responded to within one business day.

**Why are these measures important?**
The complaints handling process is an important aspect of effective stakeholder management and building confidence in Earth Resources Regulation as an effective regulator.
